

Multi-Step Addition Word Problems

Read each problem carefully, add step by step, then write the total in the boxes.

- 1.** Lisa has 120 candies, buys 30 more and gets 20 from her brother. How many candies now?

- 2.** A store has 140 apples. Then 10 more arrive, and later another 40. How many apples are there now?

- 3.** A school starts with 200 students. Then 100 new kids join, and later 50 more. How many students are there now?
