

Population Addition Word Problems

Solve each word problem by adding to find the total population

1. A town has 11,200 residents, and another has 13,400. What is the total population?

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

2. City A has 24,300 people, and City B has 15,600. What is the total population?

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

3. There are 16,500 people in a village and 17,800 in another. What is the total population?

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

4. Country X has 12,500 people, and County Y has 13,100. What is the total population?

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

5. Two neighboring cities have 17,500 and 19,100 people. What is the total population?

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$
